

ECOFLOW SUCCESS AT**The University of Oklahoma***The UNIVERSITY of OKLAHOMA***Location**

Norman, Oklahoma

Highlights

- 30,000+ students
- Top 50 public universities
- 22+ dining options on campus

Problem

The University of Oklahoma was having serious drain line backups and grease trap overflows at their Crossroads restaurant. They were spending close to \$3,000 a year on emergency maintenance and a solvent product to help move grease through the system.

Ecoflow Solution

Chemsearch FE installed a BIO-Amp™ in the Crossroads restaurant to treat the drain lines and the grease trap.

Result

Since the install they have eliminated the use of the solvent product and haven't had any issues with the drain lines or grease trap. They have saved over \$1,000 at the Crossroads restaurant alone.

The University has since added 3 more BIO-Amps and 3 DrainCobras™ at other restaurants and cafeterias on campus. The university has chosen to install Ecoflow delivery systems in new facilities as a preventative maintenance program.
